

TEDDY CBLS

Hey there,

Thank you for purchasing these TEDDY cables. Now it's up to you and put these cables to use. Connect those (TEDDY) modules, make sound, make beats, be creative, experiment, explore, inside your studio, outside with a small system running on a powerbank, at your friends place, in the morning, afternoon, evening or when you should be sleeping and had - like often happens to us - way too much coffee. Perform for others, play with friends or with yourself. These cables have a broad spectrum where they are applicable.

Go have fun !
